EDUCATION

VIT Vellore — B.Tech in Computer Science Engineering (2023 – 2027)

CGPA: 7.87

SKILLS

Languages: Python, Java, C++, SQL, JavaScript

Frameworks & Libraries: FastAPI, React, Tkinter, NumPy, Pandas, OpenCV, Streamlit

Tools & Platforms: Git, GitHub, VS Code

Databases: SQLite

Concepts: REST APIs, CRUD Operations, JWT Authentication, SQLAlchemy ORM, Object Detection

PROJECT EXPERIENCE

FastAPI Backend Service | [GitHub](#)

- Engineered RESTful APIs using FastAPI with CRUD operations and SQLite integration.
- Implemented modular routing, request validation, error handling, and JWT-based authentication.
- Used SQLAlchemy ORM for scalable backend architecture and efficient database operations.

YOLO Playground | [GitHub](#)

- Developed an AI-powered object detection application using YOLO and OpenCV for real-time image analysis.
- Built preprocessing and inference pipelines with confidence-based object classification.
- Integrated a Streamlit interface for image uploads and visualization of detection results.

Chrome Highlight Extension | [GitHub](#)

- Created a Chrome extension to save highlighted web content with title, URL, and timestamps.
- Integrated Google Apps Script and Google Sheets for automated cloud-based note storage.
- Designed the extension using JavaScript, HTML, and browser APIs for seamless interaction.

Inventory Management System | [GitHub](#)

- Built a modular inventory management application in Python with both CLI and Tkinter GUI versions.
- Implemented item creation, update, deletion, and search functionalities using structured program design.
- Focused on maintainable architecture and scalable feature integration.

CERTIFICATIONS

- Oracle AI Foundations Associate — Oracle | [Link](#)
- Introduction to Data Science — Infosys | [Link](#)
